THE STORY OF COMITTI

Comitti of London have been makers of the finest quality clocks and barometers for over 150 years. Many of the styles made in the early days continue to be available today, they are recognised as English classics and the originals sought after as valuable antiques.

The company continues to this day as a family-run business designing and making traditional and contemporary pieces. We also offer a bespoke maintenance and restoration service for all antique clocks and barometers.

Today Comitti enjoys an international reputation for outstanding workmanship and service.

THE MERIDIAN CO-AXIAL TABLE CLOCK

The Meridian is a beautifully executed timepiece inspired by the work of Dr George Daniels CBE (1926-2011), considered by many to be the finest horologist the world has seen. The movement features a special version of his co-axial escapement, a world first and unique contribution to the story of precision mechanical clockmaking.

The large balance wheel is controlled by a nickel alloy spiral balance spring that beats 60 times per minute. The symmetrical co-axial escapement is fitted with 4 ruby pallet stones, its unique action reduces friction and eliminates the need for oil. These features greatly extend the escapement service interval.

The clock also features a unique automatic Remontoire winding system that eliminates the need for a key. The winding system is powered by an energy cell in the base with a power reserve greater than 12 months.

The movement is handmade from solid brass and is available in gold or rhodium plated polished finishes. The time and passing seconds are indicated on a dial with silver plated chapters and blue finished hands in the Breguet style. The humpback case is fitted with bevelled edge glasses so that the exquisite detail of the mechanism is fully displayed. The clock is available on a choice of bases in exotic woods, gemstones and carbon.

Each movement has a unique serial number engraved on the back plate and a Certificate of Authenticity. The clock is protected in a handmade mahogany finished presentation travel case.

A unique example of the Art of the British Clockmaker that will be valued by every generation, that is inspired by human ingenuity and exquisite craftsmanship.

Presentation travel case.

LONDON

THE MERIDIAN GOLD PLATED WITH MALACHITE BASE

The Meridian is a world first and a unique contribution to the story of the art of the British Clockmaker; an exquisite timepiece for collectors and every generation that is inspired by ingenuity and fine craftsmanship.

The movement is regulated by a unique version of George Daniels co-axial escapement mounted with 4 ruby pallet stones. The Breguet style dial has silver plated chapters and the time is indicated by blue finished hands. The mechanism features an automatic winding system with a power reserve greater than 12 months.

The movement is protected by a hump back case hand made from solid brass that is polished, gold plated and mounted to a Malachite base. Crystal clear bevelled glasses allow full visibility of the superb detail of this unique timepiece.

- Gold plated movement with Malachite base
- Co-Axial escapement with 4 ruby pallet stones
- Automatic winding system with a power reserve greater than 12 months
- Fine Breguet style dial and hands
- Crystal clear bevelled glasses
- Presentation travel case
- Certificate of Authenticity

Height: 10.5" (27cm)
Width: 7" (18cm)
Depth: 5" (12.7cm)

Code: S4001G-M

THE MERIDIAN RHODIUM PLATED WITH LAPIS BASE

The Meridian is a world first and a unique contribution to the story of the art of the British Clockmaker, an exquisite timepiece for collectors and every generation that is inspired by ingenuity and fine craftsmanship.

The movement is regulated by a unique version of George Daniels co-axial escapement mounted with 4 ruby pallet stones. The Breguet style dial has silver plated chapters and the time is indicated by blue finished hands. The mechanism features an automatic winding system with a power reserve greater than 12 months.

The movement is protected by a hump back case hand made from solid brass that is polished, rhodium plated and mounted to a Lapis base. Crystal clear bevelled glasses allow full visibility of the superb detail of this unique timepiece.

- Rhodium plated movement with Lapis base
- Co-Axial escapement with 4 ruby pallet stones
- Automatic winding system with a power reserve greater than 12 months
- Fine Breguet style dial and hands
- Crystal clear bevelled glasses
- Presentation travel case
- Certificate of Authenticity

Height: 10.5" (27cm)
Width: 7" (18cm)
Depth: 5" (12.7cm)

CUSTOMER CARE AND AFTER SALES

EXTENDED WARRANTY

Comitti products have an unqualified guarantee against defective workmanship or materials for a period of 12 months from the date of purchase. This guarantee does not affect any statutory rights customers have, but is additional thereto. It does not cover any damage due to negligence, mishandling or attempted repair by anyone other than Comitti or our appointed representatives.

Customers should consult the retailer the product was purchased from or our service department before returning faulty or damaged goods. It is recommended that the product packaging is retained for at least the warranty period.

An additional 12 months warranty against mechanical failure is offered to customers who register their purchase on-line or return by post the registration card endorsed by the supplier.
